REA/CWT - A way to look at Rib Eye Area in relation to the animal's weight per 100 lbs. REA/CWT scores of 1.0 and higher are good indicators of high yield grading cattle.

Comments about Ultrasound Ratios: Bulls were ratioed for ultrasound carcass traits in the same contemporary groups as for birth and weaning performance. You will see some bulls with the same REA, 12.1 for example, with different REA Ratios. The reason for this is that there is more than one contemporary group represented in this set of ultrasound data.

Comments about bulls without ratios: It was not possible to collect ultrasound data on some of the Angus bulls until they were too old to adjust to a yearling basis so we are reporting actual scan data as collected when the bulls were approximately 18 months of age. Since data couldn't be adjusted, there are no ratios.
